

Midterm material pathology questions by Dr.Nisreen

- Lectures 1-2-3-4-5-6

- Collected by : Omar Rashdan

Lectures 1+2+3+4+5

1) A thick tunica media with abundant smooth muscles is usually present in the following type of blood vessels?

- a- veins
- b- venules
- c- lymphatic vessel
- d- arteries

2) The term 'Lymphedema' applies to which one of the following?

- a- accumulation of lymph in peritoneal cavity
- b- proximal leg swelling due to obstruction of lymphatics
- c- accumulation of lymph in pleural cavity
- d- distal leg swelling due to obstruction of lymphatics

3) ONE of the following may lead to migratory thrombophlebitis (Trousseau syndrome):

- a- long term bed rest
- b- thrombophilia
- c- pancreatic cancer
- d- smoking

4) Dilated and tortuous subcutaneous bluish vessels of the legs is the definition of:

- a- lymphadenitis
- b- lymphangitis
- c- varicose veins
- d- chylous

5) A thrombo-embolus that is 'moving through superior vena cava, right atrium, patent foramen ovale, and is currently inside the right carotid artery' is best called:

- a- arterial embolus
- b- systemic embolus
- c- paradoxical embolus
- d- saddle embolus

6) Decompression sickness refers to the following cardiovascular condition:

- a- fat embolism
- b- amniotic fluid embolism
- c- nitrogen embolism
- d- pulmonary embolism

7) In amniotic fluid embolism, the contents of amniotic sac escapes through tears and reach the fetal circulation :

- a- True
- b- False

8) Coagulative necrosis of the quadriceps muscle due to arterial occlusion is an example of a 'white' infarct :

- a- True
- b- False

9) Ischemic necrosis of the frontal lobe of the brain is termed:

- a- white infarct
- b- red infarct
- c- liquefactive necrosis

10) The most common target of venous emboli is the heart :

- a- True
- b- False

Answers

Q1	D	Q6	C
Q2	D	Q7	B
Q3	C	Q8	A
Q4	C	Q9	C
Q5	C	Q10	B

Lecture 6

1) Congenital aneurysms are considered false aneurysms because there is no tear in the vascular wall :

a- True

b- False

2) Saccular aneurysms are always false aneurysms

a- True

b- False

3) Marfan syndrome causes aneurysms by causing degeneration of arterial media

a- True

b- False

4) Chest pain and hoarseness of voice are symptoms of abdominal aortic aneurysm

a- True

b- False

5) Type B aortic dissection does not involve ascending part of aorta

a- True

b- False
